Survey results: CISO Singapore 2022

Thank you to those who participated in the survey sent out for CISO Singapore 2022.

Here is a summary of the results

When asked 'what is the main cyber security threat to your organisation?', the responses were as follows:

What is the main cyber security threat to your organisation?

The top five cybersecurity threats were **phishing**, **internal risk**, **patch management**, **cloud risk**, and **ransomware**.

When asked if they think others are facing the same issues as them, all respondents replied yes.

The top three topics respondents were keen to hear at CISO Singapore 2022 are:

1. *Security from scratch – what would you do if you were starting all over again with your security program?*
2. *Top 5 cloud security challenges to address in 2022/2023*
3. *New challenges for CISOs: readying for change and leading through turbulent times*

And the top three group discussion topics that participants are keen to engage with are:

1. *Pre-emptive security planning*
2. *Third party risks*
3. *Threat hunting*
